

## Saintbridge Pond and The Green Flag Award

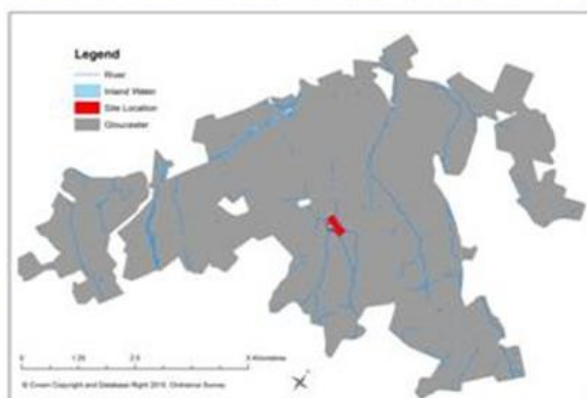

This report collates data from primary and secondary sources, and evaluates Saintbridge Pond (Left and Right), and the work the Friends (FOSP) carry out, against the Green Flag Award's 8 Criteria.

Map (Right):  
Saintbridge  
Pond is the  
largest  
inland water  
body in  
Gloucester

The figures for 1, 2, 3, 6 and 8 were created from the Questionnaire asked to the public.

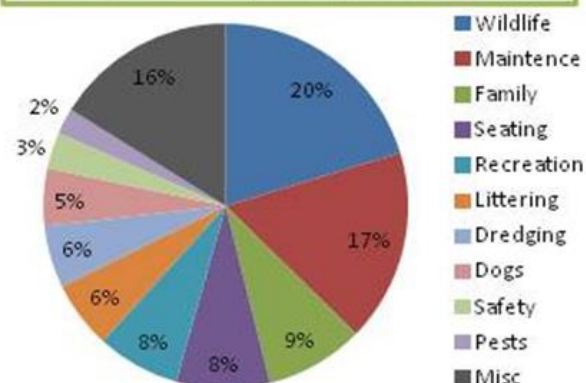

- 4 The Friends of Saintbridge Pond are considerate of effects to nature and waste in every activity undertaken, which is shown by habitat diversity.
- 5

- 7 Marketing of the site is split into technological, paper and on site methods, and these will be utilised in the three events proposed for Saintbridge Pond.

- 8 Future management of the site will more prominently consider the public view (See Below) when prioritising work

Overall, Saintbridge Pond measures well against the criteria, with the public viewing the site as welcoming, clean and safe, and showing concern for the future of the site. The future of Saintbridge Pond will be considering the sustainability, conservation, with aims to increase inclusion and monitor work undertaken.

The Action Plan found that increasing the features at site is a feasible endeavour, and the Funding Section shows it is possible.
